

EASYCRAFT

decorative walls & ceilings

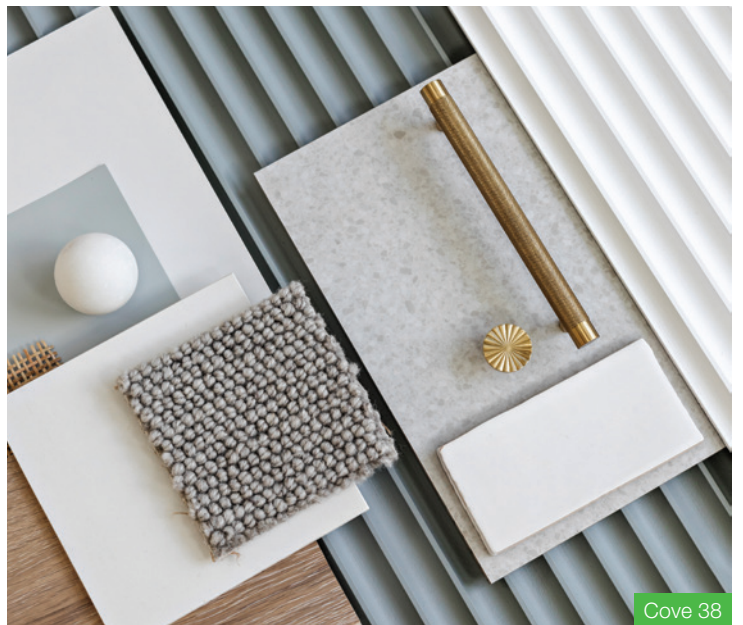

GP traditional & contemporary style

The possibilities for creating beautiful spaces are endless, with the comprehensive range of traditional & contemporary Easycraft profiles. Dress up walls and ceilings with elegance, add texture and refinement, give timeless charm to your next restoration, renovation, extension, new build or commercial project.

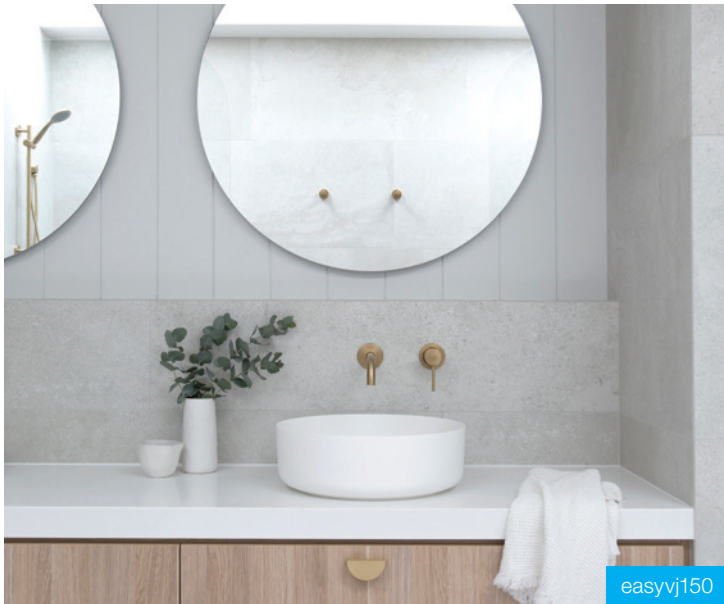

GP **Silhouette** by **easy**craft.

Crafted by the architectural and design communities, this innovative range of decorative panels provides depth, distinction and texture for your next unique design. Available in three different profiles and spacings, the tactile nature of the Silhouette profiles play with light to produce organic shapes and shadows.

WA SE wet area interior & semi exterior

Make your bathroom and laundry dreams come to life with our Wet Area Interior ultra-high moisture resistant panelling. Our Semi-Exterior hardwood panelling is perfect to add warmth and appeal to an undercover alfresco, patio, verandah or bbq area. See our Installation Guide on our website for application specifications.

GP ascot elegance

Give authentic distinction to any room: especially formal dining rooms, master suites, hallways or entry foyers. Combine with an easydado rail to complete an elegant finish. The more contemporary ascot.Vogue rail presents a sophisticated, well-defined style.

GP SE **expression** series

The Expressions range makes a confident contemporary statement and offers a large range of design options. Finish with your preferred paint colour or choose the warmth of ultra-stylish timber veneers.

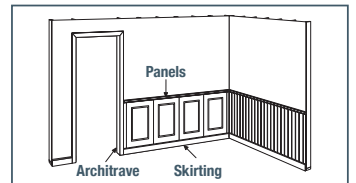

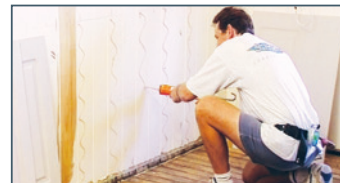

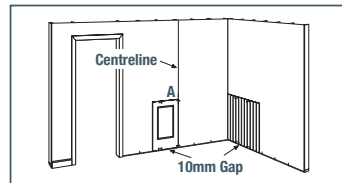

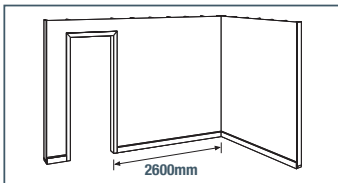

An easy DIY dado wall makeover to bring your room to life

1 Calculate what you need

2 Position the panels

3 Apply the adhesive and fit

4 Add skirting and trims

- To work out how many panels you need, simply measure the wall width, divide it by the panel width then round it up. For a single panel of 1200mm wide and a 2600mm wall, you'll need 3 panels. **Note: The panel widths vary.** Please check panel dimensions above.
- The profile of the panel determines where to begin positioning. For Ascot panels (square profile) position from the centre. For an even number of panels, start with the first panel adjacent to the centreline (position **A**). For an odd number, place the centre of the first panel on the centreline. For other profiles (VJ, Regency) you can start in the corner and work your way out to the final edge and cut to suit. Near corners, doorways or windows, measure the gap and cut panels to fit.
- Simply run a flexible adhesive down the walls allowing a 10mm gap from the floor to the base of the panel. Attach the panels using the easy joining system and use nails top and bottom to hold it secure until the adhesive cures.
- When all the panels are fitted, reattach the skirting boards, add architraves and dado rails as required. You can now finish with your final coat of paint, and sit back and admire your brand new room.
